SUMMARY OF QUALIFICATIONS

- **PMP®** certified (Project Management Professional).
- **Lean Six Sigma Green Belt** certified.
- Scrum Master (**PSM®**) and Product Owner (**PSPO®**) certified: ability to work in an Agile environment.
- Experienced in **CRM** management (**Salesforce**) and data workflows within complex, regulated environments.
- Advanced data governance skills: large-scale customer data structuring and cleaning, following the **DAMA-DMBOK** framework.
- Advanced data analysis and reporting skills in: **SQL, Python, Power BI, Tableau, and Hadoop**.
- Team-player, well organized, self-motivated, able to multitask.
- Fully **bi-lingual** (English and French) written and verbal.

PROFESSIONAL EXPERIENCE

Customer Success Analyst

04/2026 – Present

Scotiabank – Ottawa, Ontario, Canada

- Manage customer profiles, leads, and opportunities using Salesforce.
- Ensure data integrity and governance within a regulated financial services environment (FINTRAC, PIPEDA).
Spearhead data governance restructuring initiatives to align legacy customer records with institutional quality standards.
- Execute large-scale data cleansing and deduplication workflows to resolve inconsistencies across multi-source CRM repositories.
- Define and enforce standardized data entry protocols to minimize error rates and improve the accuracy of client-facing analytics.
- Collaborate with cross-functional teams to map data lineage, ensuring full compliance with internal privacy policies and external regulatory frameworks.

Data Analyst

2021 – 2024

PROIMP Financial Solutions – Ottawa, Ontario, Canada

- Documented methodologies, data definitions, and data transformation logic to promote transparency and reproducibility in analytical practices
- Executed large-scale data cleansing and normalization workflows, leveraging Power Query and SQL, to ensure high-quality, reliable data usage.
- Transformed complex vehicle financing datasets into meaningful insights for planning, prioritization, and continuous performance improvement using SQL and Power BI.
- Developed automated dashboards in Power BI, responding to leadership data requests while maintaining high standards for clarity and timelines.

Senior Analyst, Growth and Analytics

2016 – 2021

KIA Motors – Algeria

- Partnered with business stakeholders to translate business needs into analytical solutions, ensuring clarity of scope, requirements, timelines, and dashboard performance for all data requests.
- Spearheaded analysis of complex vehicle fleet and sales datasets using SQL and Python to identify expansion opportunities and support strategic network planning.
- Built robust performance indicators and automated tracking dashboards in Tableau to support executive reporting and operational decision-making.
- Established technical documentation of methodologies and data definitions, ensuring all practices adhered to internal governance standards and data privacy requirements.
- Evaluated emerging data strategies to identify process improvements and standardized reporting workflows to enhance overall organizational efficiency.
- **Project:** Customer Vehicle Sales Performance Analysis: Developed a 360-degree dashboard tracking sales volume and conversion rates, driving a 15% improvement in sales target attainment.
- **Project:** Market Penetration & Competitive Analysis: Led a multi-disciplinary initiative to analyze competitor networks, informing the strategic placement of new dealerships and increasing regional market footprint

Junior Business and Data Analyst

2012 – 2016

Renault – Algeria

- Documented comprehensive functional and non-functional requirements for reporting dashboards to ensure alignment with business objectives.
- Built detailed data dictionaries to define business capabilities and metadata, ensuring a common understanding of data elements across departments.
- Developed and documented a data quality standard framework strictly aligned with the DAMA-DMBOK methodology to improve institutional data reliability
- Documented and standardized business process documentation and reporting templates to ensure full compliance with regional requirements and improve long-term data consistency.
- Conducted rigorous data collection and validation for partner infrastructure tracking, ensuring high-level accuracy using Advanced Excel techniques like VLOOKUP, pivot tables, and conditional formatting.
- Assisted in monitoring project lifecycles by managing large datasets, responding to internal reporting requests, and maintaining clear documentation of key performance metrics.

EDUCATION

Diploma of Collegial Studies (Applied Data Science)

2024 – 2026

Collège La Cité, Ottawa, Canada

Master's Degree in Statistical Analysis

2021

Institut Supérieur de Gestion et de Planification, Algeria.

VOLUNTEER EXPERIENCE

Training and coaching for PMP, PSM, and PSPO certification candidates (2021–2024)

CERTIFICATIONS

- PMP (Project Management Professional)
- PSM I (Professional Scrum Master)
- PSPO I (Professional Scrum Product Owner)
- LSSGB (Lean Six Sigma Green Belt)
- CESAM (Applied Statistics)

INTERPERSONAL SKILLS

- Simplification of technical concepts and Analytical rigor [\[Recommendation Letter\]](#)
- Collaborative teamwork in multidisciplinary teams [\[Recommendation Letter\]](#)

TECHNICAL SKILLS

- **Data Quality & Governance:** Expert in data quality control, deduplication, standardization, and validation. Principles strictly aligned with the DAMA-DMBOK framework, focusing on accuracy, completeness, consistency, uniqueness, and traceability, supported by robust process documentation.
- **CRM & Customer Data Management:** Experienced in Salesforce administration and customer record management. Skilled in ensuring data integrity, managing customer portfolios, and designing efficient data workflows.
- **BI & Visualization:** Proficient in developing interactive dashboards to drive decision-making using Power BI, Tableau, and Streamlit. Advanced Excel expertise, including complex pivot tables and macro development to automate reporting.
- **Languages & Databases:** Strong technical foundation in Python (pandas, NumPy, scikit-learn), R, and SQL. Experienced in managing and querying relational databases, including SQL Server and MySQL.
- **Big Data & ETL:** Hands-on experience with Big Data and ETL ecosystems, including Hadoop MapReduce, HDFS, PySpark, Docker, and Databricks.
