PROFILE

Data analyst with a background in Applied Data Science (Collège La Cité) and a Master's degree in Statistical Analysis, combining hands-on experience in data quality, governance and customer data structuring within complex, regulated environments.

Led data cleaning, validation and multi-source consolidation work applying principles aligned with the DAMA-DMBOK framework (accuracy, completeness, consistency, uniqueness).

Experienced in turning raw data into clear dashboards (Power BI, Tableau, Streamlit) to support decision-making. Bilingual French-English, comfortable collaborating with varied stakeholders and simplifying technical concepts for non-specialist audiences.

TECHNICAL SKILLS

Data Quality & Governance: Data quality control, deduplication, standardization and validation; principles aligned with the DAMA-DMBOK framework (accuracy, completeness, consistency, uniqueness, traceability); process documentation

CRM & Customer Data Management: Daily use of Salesforce (customer record management), structuring and consolidation of multi-source customer databases, data integrity, customer portfolio management, data workflows

BI / Visualization: Power BI, Tableau, Streamlit, advanced Excel (pivot tables, macros) - turning raw data into clear dashboards for decision-making

Languages & Databases: Python (pandas, NumPy, scikit-learn), R, SQL, SQL Server, MySQL

Big Data / ETL: Hadoop MapReduce, HDFS, PySpark, Docker, Databricks

Project Management: Agile (Scrum, Kanban), Lean Six Sigma Green Belt, PMP

WORK HISTORY

Customer Experience Associate - Scotiabank (Ottawa) - Apr. 2026 - Present

- Customer-facing role in retail banking, using Salesforce daily (customer profiles, leads, opportunities) for customer record management; exposure to data governance regulations (FINTRAC, PIPEDA) and maintaining customer data integrity in a regulated financial services environment.

European Energy Transition Analysis - Tableau

ACADEMIC PROJECTS - COLLÈGE LA CITÉ (Jan 2026 - Apr 2026)

Tools: Tableau (geographic maps, dual axis, bullet chart)

- Interactive geographic map of 40 European countries (200 observations) showing energy production (bubble size proportional to GWh) and CO2 emissions (color gradient), with simplified data labels.
- Bar chart and dual-axis Dot/Lollipop chart (synchronized) comparing production by energy source and CO2 emissions by country, with reference thresholds and dynamic sorting.
- Bullet chart tracking actual production vs targets by energy source, with distribution bands to visualize progress thresholds. Team project.

[Tableau Public](#)

Data Validation and Quality Control - Bank Marketing

ACADEMIC PROJECTS - COLLÈGE LA CITÉ (Sept 2025 - Dec 2025)

Tools: Python, pandas, Pandera, SciPy, Seaborn, Matplotlib

- Complete data validation process on 45,211 observations (17 variables) from banking telemarketing campaigns: descriptive statistical analysis, anomaly detection (technical vs business missing values, outliers, duplicates, logical inconsistencies).
- Definition and verification of 4 cross-variable business rules, with automated schema validation via Pandera (programmatic control of accuracy, completeness and consistency).

Credit Card Default Risk - Segmentation and Analysis (UCI)

ACADEMIC PROJECTS - COLLÈGE LA CITÉ (Sept 2025 - Dec 2025)

Tools: Python, pandas, scikit-learn, Prince (PCA/CA/MCA), KMeans, Seaborn, Matplotlib

- Exploratory analysis on 30,000 clients, PCA (90% of variance explained), CA and MCA for categorical variables.
- K-Means segmentation (k=4), identification of a cluster with 62.6% default rate. Comparison of 3 approaches via radar chart.

[GitHub](#) [Portfolio](#)

Big Data Pipeline - Sales Analysis with Hadoop MapReduce and Streamlit

ACADEMIC PROJECTS - COLLÈGE LA CITÉ (Sept 2025 - Dec 2025)

Tools: Python, Hadoop (HDFS, YARN), MapReduce, Streamlit, Docker, Docker Compose

- Dockerized Hadoop cluster (1 master + 2 workers), 4 MapReduce jobs with HDFS storage and interactive Streamlit dashboard.

[GitHub](#) [Portfolio](#)

Data analyst - financial services - PROIMP (analytical services) - Sept. 2021 - Feb. 2024

- Data extraction via SQL queries on a vehicle financing portfolio database (~3,700 client files), with export and formatting in Excel.
- Cleaning and structuring of the extracted data (format normalization, handling of missing and inconsistent values) to ensure reliable use.

Other activity (Sept. 2021 - Feb. 2024): Delivery of training and coaching for PMP, PSM and PSPO certifications.

Automotive Network Development Manager - KIA Motors, Algeria - Aug. 2017 - Mar. 2020

- Data collection, structuring and analysis of the vehicle fleet to identify network expansion opportunities. Preparation of reports and dashboards for senior management.

Distribution Network Development Officer - RENAULT, Algeria - Dec. 2012 - Feb. 2016

- Data collection and quality control for partner infrastructure tracking. Preparation of reports and project follow-up.

EDUCATION

Diploma of Collegial Studies - Applied Data Science - Collège La Cité, Ottawa - Sept. 2024 - Apr. 2026

Master's Degree in Statistical Analysis - Institut Supérieur de Gestion et de Planification, Algeria - 2021 - WES Equivalency Ref. 5666449IMM

CERTIFICATIONS

PSM I - Professional Scrum Master - PSPO I - Professional Scrum Product Owner - LSSGB - Lean Six Sigma Green Belt - PMP - Project Management Professional - CESAM - Applied Statistics (Feb. 2024)

INTERPERSONAL SKILLS

Bilingual French and English

Communication and simplification of technical concepts [\[Recommendation Letter\]](#)

Collaborative teamwork in multidisciplinary teams [\[Recommendation Letter\]](#)

Analytical rigor [\[Renault Algeria Award - March 2015\]](#)

Autonomy and complex project management

Intellectual curiosity and continuous learning
